HARSHA JAGADISH

Data Science | Multi-Agent Systems Builder | Google ADK Developer

harshajagadish320067@gmail.com | LinkedIn | GitHub | Kaggle | Portfolio

EDUCATION

Indian Institute of Technology, Madras (IIT Madras) **May 2025 – Present**
Bachelor of Science (BS) in Data Science and Applications India

- **Milestone:** May 2026 Foundation Certificate.
- **Coursework & Focus:** Computational Thinking, Python Programming, Data Structures, Predictive Modeling, and Mathematical Foundations for Data Science.

TECHNICAL SKILLS

- **AI & Multi-Agent Systems:** Google Agent Development Kit (ADK), Multi-Agent Systems, Agentic Workflows, LLM Applications, Retrieval-Augmented Generation (RAG), Speech AI (STT/TTS), Vector Search (CLIP), Prompt Engineering, Model Training, AI Integrations, AI-Assisted Development.
- **Programming & Web:** Python, JavaScript, Node.js, React, Tailwind CSS, SQLite, Docker.
- **Data Science & Security:** Data Analysis, Data Modeling, Machine Learning, Data Visualization Tools, Spreadsheet Skills, Cybersecurity Fundamentals.

PROJECTS

ZentroMart AI Voice Support Agent (VoiceOps) | *Python, RAG, Speech AI (STT/TTS), LLM, Prompt Eng.* **Oct 2026**

- Built a voice- and text-enabled AI customer support agent for an e-commerce marketplace using a policy-grounded RAG architecture.
- Engineered multi-turn conversational flows strictly grounded in company policy documents, integrating user identity verification, live order lookups, and bidirectional speech synthesis (STT/TTS).

Photopodra – Local-First Vector Search Gallery | *JavaScript, Node.js, React, SQLite, CLIP, Docker* **Oct 2026**

- Developed a fast, privacy-focused, local-first photo management gallery inspired by Google Photos that executes semantic AI image search entirely on the user's machine.
- Integrated CLIP embeddings with SQLite and a containerized Node.js/React interface to enable natural-language visual search without external cloud dependencies.

Arbitr-AI – Multi-Agent Legal Review | *Python, Multi-Agent Systems, Agentic Workflows, LLMs* **Jul 2026**

- Collaborated in a 3-member team to architect a multi-agent legal review platform that democratizes contract and legal document analysis.
- Orchestrated specialized collaborative AI agents to parse complex legal text, extract critical clauses, and synthesize actionable review intelligence.

Voyager – Multi-Agent Travelling Agent | *Python, Google ADK, Multi-Agent Systems, Real-Time APIs* **Dec 2025**

- Co-developed an autonomous AI travel planner leveraging the Google Agent Development Kit (ADK) and real-time Google data to generate personalized itineraries.
- Designed multi-agent coordination workflows to cross-reference location heuristics, timing constraints, and live service data.

CERTIFICATIONS & TRAINING

- **Google Prompting Essentials** – Google / Coursera **Aug 2026**
- **Google AI Essentials** – Google / Coursera **Aug 2026**
- **2026 Sagan Summer Workshop (Letter of Attendance)** – IPAC at Caltech **Jul 2026**
- **5-Day AI Agents: Intensive Vibe Coding Course** – Kaggle **Jul 2026**
- **Summer Analytics 2026 (6-Week Data Science & ML Program)** – CAC, IIT Guwahati **Apr 2026**
- **Gemini Certified University Student** – Google for Education **Apr 2026**
- **Deloitte Australia Data Analytics Job Simulation** – Forage **Jan 2026**
- **Web Trapped: Cybersecurity 101** – Sunderbans House, IITM BS Degree **Jan 2026**
- **5-Day AI Agents Intensive Course with Google** – Kaggle **Dec 2025**
- **Python (Basic) Certificate** – HackerRank **Dec 2025**
